DETAILED ACTION

This communication is in response to applicant's 08/08/2005 amendment(s)/response(s) in the application of **DIAS et al.** for "**STATEFUL BUSINESS-TO-BUSINESS PROTOCOL EXCHANGE**" filed 06/29/2001. The amendments/response to the claims have been entered. Claims 1, 8, 15, 17-18, have been canceled. No claims have been added. Claims 2-7, 9-14, 16, 19-24 are now pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-7, 9-14, 16, 19-24 rejected under 35 U.S.C. 103(a) as being unpatentable over Kuznetsov (US 6,772,413) in view of Admitted Prior Art (figure 3 and pages 7-8).

Regarding claims 4, 6, 11, 13, 21, and 23-24, Kuznetsov discloses a method of communicating between two business entities, each of the business entities utilizing a different communication protocol, wherein a business conversation is established between the entities, the method comprising the steps of:

providing a business-to-business (B2B) protocol exchange for facilitating communications between the business entities, the B2B protocol exchange being operatively connected to the business entities;

receiving, at the B2B protocol exchange, a message from one of the business entities in a first communication protocol; translating the received message in the first communication protocol into a translated message in a second protocol used by another of the business entities; and

sending the translated message to the other business entity (col. 7 lines 63 to col. 8 line 19).

Kuznetsov fails to explicitly disclose that identifying a postback universal resource locator (URL) associated with a target business entity; and sending the translated message to the postback URL; and storing the postback URL associated with the target business entity.

The APA discloses identifying/generating a postback universal resource locator (URL)/a conversation identifier associated with a target business entity; and sending the translated message to the postback URL; and storing the postback URL associated with the target business entity (figure 3 and page 7 last paragraph to page 8 first paragraph).

Therefore, it would have been obvious to one having ordinary skill in the art at the time of invention was made includes the teaching of APA in the system taught by Kuznetsov in order to take advantage of commonly employed method of transferring data over the Internet.

Regarding claim 2, Kuznetsov discloses translating the received message is based on information included in one or more prior messages received by the B2B protocol exchange during the business conversation (the FMRED is build based on prior messages, see col. 11 lines 39-56; and figure 6).

Regarding claim 3, Kuznetsov discloses storing information relating to the business conversation, the information being used for translating a subsequent message (the FMRED is build based on prior messages, see col. 11 lines 39-56; and figure 6).

Regarding claim 5, Kuznetsov discloses translating the received message further comprises the steps of: determining a protocol of a target business entity; and translating the received message into the target business entity protocol (see col. 7 line 10-22).

Regarding claim 9, Kuznetsov discloses the operation of translating the received message is based on information included in one or more prior messages received by the protocol exchange during the business conversation (the FMRED is build based on prior messages, see col. 11 lines 39-56; and figure 6)..

Regarding claim 10, Kuznetsov discloses the at least one processor is further operative to: (iv) store information relating to the business conversation, the information being used for translating a subsequent message (the FMRED is build based on prior messages, see col. 11 lines 39-56; and figure 6).

Regarding claim 12, Kuznetsov discloses the at least one processor is further operative to: (iv) determine a protocol of a target business entity; and (v) translate the received message into the target business entity protocol (see col. 7 line 10-22).

Regarding claim 16, Kuznetsov discloses the business entities are operatively connected to the protocol exchange via one or more networks (see col. 7 lines 63-66).

Regarding claim 19, Kuznetsov discloses the step of translating the received message is based on information included in one or more prior messages received during the business conversation (the FMRED is build based on prior messages, see col. 11 lines 39-46 and figure 6).

Regarding claim 20, Kuznetsov discloses storing information relating to the business conversation, the information being used for translating a subsequent message (the FMRED is build based on prior messages, see col. 11 lines 39-46 and figure 6).

Art Unit: 2661

Regarding claim 22, Kuznetsov discloses translating the received message further comprises the steps of: determining a protocol of a target business entity; and translating the received message into the target business entity protocol (see col. 7 line 10-22).
